## **SOAR INTO THE SURREAL WORLD OF PANZER DRAGOON**

**-- Extraordinary Perspective Lures Gamers Into New Worlds of Immersive Interactivity --**

LOS ANGELES, May 11, 1995 -- Navigate the next dimension on the wings of an armored blue dragon in this surreal, action-adventure journey only on Sega Saturn™, the ultimate gaming system. "Panzer Dragoon™" lifts gamers out of their seats, thrusting them into a surreal adventure where Sega Saturn's dynamic, first-person perspective will keep them looking over their shoulders.

This 31st century mystical world is crawling with giant cyborg insect armies under the rule of the Dark Dragon. Armed with a deadly weapon from the ancient past and the guidance of your armored dragon, your mission is to keep the Dark Dragon and his endless legions of deadly foes from infesting the world.

Sega Saturn brings this mystical adventure to the next dimension with hauntingly beautiful futurescapes, multi-dimensional action and incredible perspectives that put you on the back of your dragon (or directly behind it) and allow you to look off the left or right wing or the tail. You have intense action coming from all sides.

Intense and fast-paced, gamers must skillfully navigate through seven intricate levels that send you soaring through breathtaking tropical blue ocean cities and air-tight subterranean passageways. Battle evil giant dragon flies and man-sized killer wasps coming at you in 360 degrees of action. A spectacular, original soundtrack in 360 degree surround-sound is powered by Sega Saturn's advanced DSP, setting just the right tone for an all-sensory gameplay experience.

Select from an ancient arsenal of weapons to battle your way through the ruins, destruction and genetically altered enemies: a laser given to you by the fallen Dragon Rider to strike your targets with a powerful blast and a homing laser that lets you destroy up to eight enemies at a time. Each area you confront has a set number of enemies -- the more you destroy, the more credit you are granted to re-energize your Dragon.

Rated KA for all ages with animated violence, "Panzer Dragoon" will be available on Sega Saturn this Fall.
